Want more money to spend on the things that really matter?

Want to pay off your debts quicker or save for something special? Do you get to the end of the month and wonder where all your hard earned dollars went?

Clever, realistic planning can set you on the right path faster than you think – and while it's not all beer and skittles, you should still be able to have a little fun!

The team at Power2 has developed a unique Cash Tracker system designed to help identify and plug holes in your budget. This doesn't mean you have to cut out your annual holiday – we'll show you how to save money in other, less noticeable areas, helping you get ahead faster.

While most of us pay a lot of attention to big expenses like holidays and cars, we tend to gloss over the little things we spend money on each day – and these little things can have a big impact on us financially. By making relatively painless changes to your daily spending habits, you can pay off your debts or save a home deposit sooner. And you'll still be able to splash out every now and then!

Once we understand your financial position, we'll help you create a plan and make simple changes that will cut your everyday spending. We'll advise you on all areas of your finances, putting you in control of your debts, superannuation, insurance, tax, investments and retirement planning. And we will save you money.

Find out more by asking to talk to one of our consultants and start saving today.
